P.O Box 11038-00100 Nairobi

Established Date: 19/12/2002

Company Summary

Hospital Consumables Kenya Limited is a wholly Kenyan company.

The directors bring in many years of experience in the Health care sector having been involved in:

Supply of equipment and consumables over the years in the industry,
Maintenance of the equipment
Technical support in design and specification of sites and equipment for various customers
Our motivation is to provide quality products at affordable prices in the Kenyan market and East Africa as a whole

No equipment is so well designed and manufactured that it will NEVER fail, for this reason we pay special emphasis on getting principals who are ready to offer us back up in cases of equipment failure. It is this commitment that we extend to our customers

IFMIS NUMBER: 929590

Mission, Vision & Values

Mission

To build long-term relationships with our customers and provide exceptional customer service by pursuing business through innovation.

Vision

To provide quality services and products that exceed the expectation of our esteemed customers .

Values

Respect, Creativity ,Honesty, loyalty
,moral business ethics

PRINCIPLES

EUROMEX MICROSCOPPEN HOLLANDE

Euromex Microscopen BV is a leading manufacturer of microscopes and other optical instruments. Euromex has become a world-class supplier of biological and stereo microscopes.

The corporate office is based in Arnhem, The Netherlands. A facility with a 2,000 m² conditioned logistics warehouse, an optomechanical workshop, an R&D department and a high-level quality control department.

Around the world, Euromex operates in more than 120 countries through distributors and resellers. A wide variety of customers such as schools and educational institutes, clinical and research laboratories and a broad range of industrial customers are using Euromex microscopes.

Euromex Microscopen bv is a subsidiary of Euromex Optics Group bv, a group holding company with active subsidiaries in the field of optical instruments and high level optical and opto-mechanical components.

.

WOODLEY EQUIPMENT COMPANY LIMITED

With a heritage stretching back almost 30 years, Woodley Equipment is a world leading, one-stop supplier of equipment solutions to the Clinical Trials Industry.

As a private company, Woodley was established in October 1989 and now operates from three offices and warehouse premises in the North West of England and office and warehouse premises in New York, USA.

Developing a network of suppliers and service providers around the globe, Woodley has successfully grown, establishing a reputation for consistently providing quality, reliable equipment services. This is reflected in the achievement of an ISO 9001:2015 accreditation recognizing the quality of our administrative and management **systems**.

DRUCKER DIAGNOSTICS INC

Drucker Diagnostics is a world leader in the design and production of centrifuges, dry hematology analyzers, specimen protection lockboxes, and fluorescence microscopy products.

Founded in 1932, Drucker has become the most common centrifuge brand in reference labs. Our entire product line is proudly designed, built, and supported in the USA. All operations take place in-house at our operating centers in central Pennsylvania, just outside of State College, PA.

SHELDON MANUFACTURING , INC(SHELLAB)

Sheldon Manufacturing, Inc. is an ISO 9001:2008 certified manufacturer of high quality and innovative constant temperature equipment to the global market. Major product lines include incubators, humidity test chambers, ovens, water and bead baths, and anaerobic chambers for the life science, pharmaceutical, biomedical, environmental and industrial markets

PROHS.

PROHS is a company dedicated to the development and manufacture of hospital, laboratory and veterinary equipment, specialized in the area of disinfection and sterilization.

Covering all the needs of a central sterilization service (RUMED), PROHS stands out for the ability to design, manufacture and install sterilization units adapted to the needs and requirements of each Hospital or Clinic.

In the laboratory area, from an embryonic stage we accompany and advise the client in the process of developing a solution adapted to the sterilization and disinfection needs of each project.

MR INTERNATIONAL HEALTHCARE TECHNOLOGY CO. LTD

MR group headquartered in Hong Kong, with five manufacture facilities in different provinces of China, is a reliable IVD products supplier.

EUROIMMUN MEDIZINISCHE LABORDIAGNOSTIKA AG:

EUROIMMUN has extensive expertise in the fields of immunology, cell biology, histology, biochemistry and molecular biology. It produces test systems for the laboratory diagnosis of autoimmune and infectious diseases, allergies, and for gene analyses. In the foreground are test systems for the determination of antibodies, but also of antigens and genetic markers in patient samples. They are based on both immunohisto-chemical and biochemical methods, such as indirect immunofluorescence, microtiter ELISAs and different blot techniques (**Westernblot, EUROASSAY, EUROLINE, EUROLINE-WB**), and techniques from molecular biology (microarray). EUROIMMUN bases its production on modern, state-of-the-art procedures and microanalysis techniques which partly carry worldwide patents. The company is amongst the leading manufacturers of medical laboratory diagnostic products.

ARDO MEDICAL AG:

Ardo medical AG is a Swiss family company, now in its second generation, which has dedicated itself wholeheartedly to developing, producing and distributing breastfeeding aids and medical technology equipment

SPL LIFE SCIENCES

Since established in 1987, we are dedicated to manufacture high quality plastic lab-ware, consistent to the finest standards in the industries. With a team of enthusiastic professionals continuously engaging in research, development and quality control, our products fully comply with the international regulatory requirements.

LMB TECHNOLOGIES GMBH

Lmb Technologie GmbH installed the first device for separation of whole blood and closed a gap to offer devices for the entire process of blood production, from the donation to the distribution. Today Lmb's range of products comprises devices for the donation of blood, filtration, separation, irradiation, storage and transport to offer a global solution.
